

Read what our customers are saying about our Color Control System training:

"QuadTech's Color Control System Follow-Up Operator and Maintenance Training course provided the essential training our employees needed to produce the best color and maximize the efficiency of our color control equipment. With additional training, our employees were able to achieve greater control over color consistency; thereby, improving our ability to make re-runs more efficient."

Colin Shaylor, Commercial Director,
Howard Hunt Group, England

"We used QuadTech's Color Control System Operator Workshop as a 'Train the Trainer' involving pressroom supervisors and training personnel. It is a great tool for up-front understanding of what the system could do in our facility. Our installs went much smoother with the knowledge we learned before the systems arrived. We were able to formulate operator procedures specific to our needs prior to installation. The classroom setting gave us the opportunity to learn at our speed without the distraction of a running press."

Dan VanHoof, Print Specialist,
Banta Book Group, USA

"Attending QuadTech's Color Control System Operator Workshop gave me an understanding of how the system works, and how to use it. This knowledge has been an important factor in making the four Color Control Systems at Anderson Lithograph very effective tools in our web development."

Michael Legg, Web Press Operator,
Anderson Lithograph, USA

We offer onsite and Web-based training options as well as Advanced Training Programs for Operators and Maintenance personnel at QuadTech facilities.

Contact your sales representative for additional information about our training programs and related costs.

For an optimum training experience, classes are limited to only six people. To register for a class or for more information, contact the QuadTech Training Department at 414-566-7500 or e-mail us at training@quadtechworld.com.

QuadTech®

QuadTech®

Training Programs

Congratulations! You have invested in the most advanced technology available in the printing industry.

We design QuadTech controls with industry-leading technologies that improve accuracy, quality, and consistency.

Realize the return on your investment faster by taking advantage of QuadTech's comprehensive training programs. Our expert training specialists will provide your employees with the training necessary to maximize their skills.

And because no two presses are exactly alike, our trainers help you optimize the system responses and your targets in order to enhance overall performance and produce the best results possible.

You will quickly recover the cost of training through less downtime, consistent quality, reduced waste, and improved ramp-up time.

Operator Overview Training

How:

WebEx web conferencing with a training specialist

Audience:

Press operators, maintenance, prepress, and supervisors

Topics:

Overview of basic operation screens, navigation, job setup, and online help

Prerequisite:

Experience working in press or prepress environments

Mark Plating

How:

WebEx web conferencing or telephone call with a training specialist

Audience:

Prepress

Topics:

Mark specifications, mark file types, printed samples, System Brunner measurements/targets

Prerequisite:

Experience working in prepress environment

Color Control System Operator Workshop

How:

At QuadTech with a training specialist

Audience:

Product champion and lead/key operators

Topics:

Color theory, color management, reporting functions, plateroom specifications, standardization and optimization

Prerequisite:

Previous experience with Microsoft® Windows®, working knowledge of web browsers, Windows® Explorer, and relevant QuadTech equipment

Basic Operator and Maintenance Training

How:

At your site (typically included with start-up training and commissioning) with a field service technician

Audience:

Press operators and maintenance

Topics:

Basic operation screens, job setup, online help, basic operational diagnostics, system cleaning and daily maintenance

Prerequisite:

Experience working on offset presses

Onsite Operator Training

How:

At your site with a product trainer

Audience:

Press operators and maintenance

Topics:

Advanced operator screens, advanced operational diagnostics, general report capability, system performance optimization, refresher training, and system maintenance

Prerequisite:

Completion of the Basic Operator and Maintenance Training course or the Operator Overview Training course

Follow-Up System Brunner Training

How:

At your site with a System Brunner trainer, up to 24 hours included with the purchase of the Instrument Flight® software

Audience:

Press operators, prepress, and supervisors

Topics:

Additional training on Instrument Flight® and gray balance concepts, operator training, press test form, and plate checker analysis of color reproduction

Prerequisite:

Completion of the Follow-Up Operator and Maintenance Training course

Technical Training

How:

At QuadTech or onsite with a technical trainer

Audience:

Maintenance and IT professionals

Topics:

Operator and basic maintenance training, system hardware, system software, system configuration, and troubleshooting

Prerequisite:

Previous experience with Microsoft® Windows® and an electrical or electronics background

Hands-On Lab

How:

From any location, connect to a QuadTech user interface demo with a high-speed connection

Audience:

Press operators and supervisors

Topics:

Hands-on practice with the user interface, general navigation, jobs setup, online help, operation and basic maintenance

Prerequisite:

Operator Overview Training course

Demo System

How:

QuadTech demo user interface shipped to you

Audience:

Press operators and supervisors

Topics:

Hands-on practice on user interface, general navigation, jobs setup, online help, operation and basic maintenance

Prerequisite:

Operator Overview Training course
